PROFILE

Computer Science graduate (Mumbai University, 2025) specialising in real-time graphics, 3D web experiences, and systems development. Proficient in C++, OpenGL, Three.js, and Linux environments, with hands-on experience in GPU optimisation, WebGL pipeline design, game development, and production-grade RPA automation. Certified in Oracle Vector Search, C++20, Modern OpenGL, and UiPath RPA. Passionate about pushing the boundary between art and technology through interactive and immersive digital experiences.

EXPERIENCE

3D Web Developer

EBR Agency

Feb 2024 – Nov 2024

- Built interactive WebGL scenes in Three.js using instancing, texture atlases, and draw-call reduction for smooth browser performance.
- Handled full asset pipeline — Blender modelling, UV mapping, export, and browser-side optimisation.

Three.js WebGL JavaScript Blender GLSL

3D Modelling & Animation Artist

Terractive · EBR Agency

Oct 2024 – Dec 2025

- Modelled and animated 3D assets in Blender for real-time web projects, following client brand guidelines.
- Built export pipelines for seamless handoff to developers for live web integration.

Blender Spline Framer

RPA Developer

FeatSystems

Dec 2024 – Apr 2025

- Built production UiPath bots with error handling, retry logic, and multi-environment config for business workflow automation.
- Documented bot workflows and delivered handover materials to client operations teams.

UiPath RPA VB.NET

Game Developer

Personal & Campus Projects

Present

- Developed 2D/3D game mechanics, AI systems, and physics in Unity (C#) and Python/Pygame across multiple projects.
- Created custom Blender assets and integrated them into Unity game environments.

Unity C# Python Pygame Blender

PROJECTS

Sinister Passage

3D Horror Survival Game · Unity, C#, Blender

Full 3D horror survival game featuring atmospheric lighting, AI-driven enemy behaviour, physics interactions, and entirely custom Blender-modelled environments. Designed for atmospheric tension and fluid player control.

Unity C# Blender

Marine Wildlife Education Platform

Interactive 3D Web · Three.js, WebGL

Interactive 3D learning website for marine wildlife education featuring immersive WebGL scenes, educational UI overlays, and smooth camera transitions to guide user exploration.

Three.js WebGL HTML/CSS/JS

Retro Music Player

Web App · HTML, CSS, JavaScript

A nostalgia-driven retro-themed music player website with a vintage aesthetic, custom UI controls, and smooth playback interactions built entirely with vanilla web technologies.

HTML CSS JavaScript

CyberEtro

3D Cyber-Retro Interactive Website · Blender, Spline, Framer

Immersive cyber-retro themed 3D web experience combining Blender-modelled assets with Spline interactivity and Framer for final deployment. Focused on visual storytelling and smooth user interaction.

Blender Spline Framer

2D Pixel Fighting Game

Game · Python, Pygame

Side-scrolling 2D pixel art fighting game built entirely from scratch with frame-based sprite animation, collision detection systems, and reactive AI opponent logic.

Python Pygame

EDUCATION

B.Sc. Computer Science

Mumbai University

2025 · Mathematics, Computer Graphics, Systems, DBMS, Algorithms

CERTIFICATIONS

Oracle Vector Search Professional	2025
C++20 Masterclass	2024
Computer Graphics — Modern OpenGL	2024
UiPath RPA Certification	2024
NPTEL — Introduction to Big Data	2023
NPTEL — Introduction to DBMS	2023

SKILLS

LANGUAGES · C, C++, C#, Python, Java, Rust, Zig, Kotlin, R, Lua, Assembly

WEB / JS · HTML, CSS, JavaScript, Node.js, AngularJS, Three.js, WebGL, GLSL

GRAPHICS · OpenGL, Vulkan, DirectX, Three.js

3D & TOOLS · Unity, Unreal, Godot, Blender, GIMP, Houdini, Spline, Dora, Figma, Framer

DATABASES · MongoDB, Oracle SQL, SQLite, PL/SQL

AUTOMATION · UiPath Studio, UiPath Orchestrator
